

## ENVIRONMENTAL POLICY STATEMENT

The company, on behalf of the Transport for Greater Manchester, operates and maintains the tramway system, being responsible for operating the system per se, and for the supporting activities, such as track maintenance, de-littering, station maintenance etc.

In order to conform to the requirements of BS EN ISO 14001: 2004, we will maintain adherence to relevant environmental legislation and to other requirements to which the company subscribes, and will maintain dialogue with the respective authorities in this regard. Our aim is to strive for continual improvement through the review of our environmental objectives and targets, and purposeful evaluation of our processes in order to prevent pollution.

As we are committed to complying with customer, legislative and regulatory requirements, we will continually improve the effectiveness of the environmental management system, which will be reviewed at appropriate intervals, and which will provide the framework for the setting and review of the environmental objectives and targets.

Our policy is to offer the most competitive, professional, and environmentally efficient service consistent with costs, and to ensure that the company's objectives and targets are met in line with the TfGM's needs and expectations. We recognise the implications of the requirements as specified in the various regulations to which we operate, and we will ensure that the operations carried out will actively prevent pollution as far as is practically possible.

To facilitate and ensure such success, our system of operation has been defined in the system manual and its supporting procedures, compiled around the requirements of BS EN ISO 14001: 2004. The requirements as specified in the above system are expected of all personnel.
